2E-EDUC 4- ASSESSMENT OF LEARNING
Term 2 SY 2025-2026

Classroom Teaching Observation Tool

I. CTP Student Profile

Name of CTP Student: EVARDO, Ezekiel John M.
Degree Finished: BS in Psychology
CTP Subject Enrolled: Educ 4 – Assessment of Learning

II. School Observation Profile

School/Institution: Philippine Normal University
Date of Observation: February 24, 2026 Time: 1:00 PM - 3:00 PM
Learning Area/Subject Observed: Technology and Livelihood Education
Grade/Year Level: Grade 8
Duration: 3 hours
Subject Matter/Topic: Family and Consumer Sciences - Table Napkin Folding
Lesson Objectives:

1. Identify the importance of napkin folding in table appointments.

2. Demonstrate at least 10 basic napkin folding techniques (e.g., Pyramid, Bishop's Hat, Fan) in two minutes.
3. Appreciate the value of creativity and precision in food service.

MY PERSONAL OBSERVATION EXPERIENCES

Questions	Actual Observations
1. How did the teacher begin the lesson?	The teacher started the class with a greeting and asked the students to keep the room clean and tidy.
2. How did the teacher communicate the lesson objectives?	The teacher simply recalled the previous topic of how to set cutlery, plates, and glassware to the table and started to transition to napkins on table spreads.
3. What content/topic did the teacher develop in the lesson?	She discussed table napkin folding as a part of table appointment in fine dining and catering events.
4. How did the teacher implement/carry-out the activities in the following: (A) Lesson Introduction/Introductory Part	The teacher simply recalled the previous topic of how to set cutlery, plates, and glassware to the table and started to transition to napkins on table spreads.
(B) Lesson Development	She demonstrated table napkin folding in 10 ways as the students follow her.
(C) Culminating/Closure	She ended the class through a practical assessment of the first 10 students who volunteered for their assessment. The remaining students will be conducting their practical examinations next meeting.
5. What teaching approaches/methods did the teacher use? Enumerate them and describe the steps (if possible)	She uses direct instruction by allowing students to mimic her folding strategies. • She uses explicit modeling, as she proves to be the expert of the fold sequences. • She also used step-by-step scaffolding during the assessment to correct the errors done by the students. • She was also keen and giving with immediate feedback to her students during her explicit modeling and scaffolding.

6. What instructional materials including technology were used by the teacher?	She hasn't presented any instructional material as she already knows the folding sequences by heart.
7. How did the teacher assess the attainment of the lesson objectives?	She asked for 10 students wishes to volunteer for their practical exam to assess if the folding sequences she demonstrated was successfully transferred to the students.

OBSERVATION TOOL FOCUSED ON ASSESSMENT

Study the rubrics found below for Indicators 20 and 21 of the Classroom Observation Tool.
Based on your observation, check the score (from 1 to 9) of the performance of the observed teacher.
The descriptions in the "Features of Practice" and in the "Clarification" that follows may help you to understand further the description for each score in the indicator.

INDICATOR 20	Design, select, organize and use diagnostic, formative and summative assessment strategies consistent with curriculum requirements							
1	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**
The teacher does not provide any form of assessment during the lesson.	The teacher attempts to incorporate assessment in the lesson without set criteria.	The teacher provides a limited range of assessment strategies but fails to address the learning goals.	The teacher provides a range of assessment strategies but only some are aligned with the learning goals.	The teacher provides a range of assessment strategies that address most of the learning goals.	The teacher provides assessment strategies consistent with the curriculum requirements.	The teacher integrates assessment strategies that engage learners in self- and peer-assessment.	The teacher fully integrates assessment strategies taking into account different learners' cognitive levels as well as their particular learning needs.	The teacher and learners collaboratively set and attain the learning goals using assessment strategies consistent with the curriculum requirements.
FEATURES OF PRACTICE								
1. There is no assessment or monitoring of students' learning. 2. The teacher does not demonstrate the ability to use assessment to measure learner progress.	1. The teacher does not provide a set of criteria to assess the learners' work. 2. The teacher does not provide a set of standards, e.g. rubric or checklist, to assess the learners' work and output.	1. The teacher uses assessment procedures focused on task completion and/or compliance rather than learner achievement of lesson purpose/ objective.	1. The teacher uses a variety of assessment strategies, but some do not measure the intended learning outcomes. 2. The teacher uses procedures that yield only some evidence of learning.	1. The teacher uses a repertoire of assessment strategies which are aligned with the intended learning goals. 2. The teacher uses assessment procedures that draw out evidence of whether learners have learned the intended learning outcomes.	1. The teacher predominantly uses assessment strategies which are embedded as an integral part of the lesson and are aligned with the intended instructional or consistent with the content standards. 2. The teacher encourages the learners to assess and monitor the quality of their work against the assessment criteria and performance standards.	1. The teacher uses assessment strategies which engage learners in assessment criteria to self-monitor and reflect on their own progress. 2. The teacher prompts learners to frequently assess their own work and the work of their peers using assessment criteria embedded in teacher- or learners-generated rubrics, peer reviews, and/or reflection logs.	1. The teacher successfully uses multiple learner data and feedback to inform future instructional decision making and to differentiate instruction to address individual learning needs.	1. The teacher involves learners in developing self-assessment strategies to monitor academic goals. 2. The teacher requires learners to set their own instructional outcomes based on feedback. 3. The teacher provides learners with opportunities to evaluate and contribute to the development of criteria/rubrics.

CLARIFICATIONS

ASSESSMENT STRATEGIES:

DIAGNOSTIC
assessment used to identify each learner's strengths, weaknesses, knowledge, and skills prior to instruction,
e.g., pretest, drills, review, anticipation guide, content knowledge boxes

FORMATIVE
assessment used to identify knowledge and/or skills that learners can hone/build on or need to improve,
e.g., recitation (show of hands, response cards, happy/sad face), activities (games, tableau, exit cards), and seat works (reflection journal, exercises, practice)

SUMMATIVE
assessment used to identify learner achievement of the objectives of the lesson,
e.g., written works (quizzes, essays), performance tasks (skills demonstration, group presentations, oral work)

INDICATOR 21	Use strategies for providing timely, accurate and constructive feedback to improve learner performance

1	2	3	4	5	6	7	8	9
The teacher does not provide any feedback to help learners improve their learning.	The teacher attempts to provide feedback but does not result in improving students' learning.	The teacher rarely provides feedback that results in limited opportunities for learners to improve their learning.	The teacher occasionally provides feedback that results in opportunities for majority of the learners to improve their learning.	The teacher frequently provides feedback that results in opportunities for most of the learners to improve their learning.	The teacher consistently provides feedback that results in opportunities for all learners to improve learning and leads to assess their own progress.	The teacher consistently provides feedback that results in opportunities for all learners to improve learning and to assess their own progress and that of others.	The teacher adjusts and refines different forms of feedback grounded on students' learning needs.	The teacher creates and maintains a learning environment that supports learners' life-long learning through teacher-learners and learners-learners feedback.
FEATURES OF PRACTICE								
1. Learners receive no feedback. They have no idea if they are on the right track in achieving the intended learning outcomes.	1. Teacher's feedback is of poor quality and not oriented toward future improvement of learning. It lacks specificity or is untimely and inaccurate. 2. Feedback is dismissive, does not explain what went "wrong," and does not suggest a specific course of action for the learner to follow.	1. Teacher's feedback is superficial, not informative, and not constructive. 2. Feedback is directed to only some of the learners. 3. Teacher's feedback partially guides learners toward the intended learning outcomes and does not target students' strengths and weaknesses.	1. The teacher provides accurate feedback but sometimes absent when it is necessary. 2. Feedback is selective to some groups of learners. 3. The teacher falls short of addressing the learners' common need/ weakness.	1. The teacher provides accurate, timely, and constructive feedback, i.e. suggestions/ tasks/ activities/ clarifications, that fully guides most of the learners toward the intended learning outcomes.	1. The teacher provides substantive, specific, and timely feedback, and shares strategies to learners to improve their performance toward the intended learning outcomes.	1. The teacher establishes a routine for constructive feedbacking where learners can participate and respond productively. 2. The teacher provides opportunities for self and peer feedbacking that is specific and is focused on advancing their learning of the lesson on hand.	1. The teacher provides individualized, descriptive feedback that is accurate and actionable to help learners advance their learning. 2. The teacher uses varied forms of feedback that are accurate and specific which can maximize students' ability to learn.	1. The teacher consistently sets up a constructive learning environment that instills positive stance towards giving and receiving feedback which can be applied to real-life context.

CLARIFICATIONS	
FEEDBACK essential and culturally-appropriate written and/or oral information about learners' behavior/ performance/ output that can be used to raise awareness on their strengths and weaknesses as bases for improvement **MAJORITY** more than half **MOST** almost all, approaching 100%	**RARELY** seldom occurs **OCCASIONALLY** irregularly occurs **FREQUENTLY** often occurs **CONSISTENTLY** constantly occurs

Complete the table below. This is the most important part of this worksheet.

Indicator	***Score and description that you have given (copy the description from the rubrics found above)***	***Your reasons (Explain thoroughly your observations that support the score that you have given)***
(#20) **The teacher designed, selected, organized and used diagnostic, formative and summative assessment strategies consistent with curriculum requirements**	7 The teacher applied a variety of assessment tools and strategies (diagnostic, formative, and summative) that are consistently aligned with the curriculum requirements and intended learning outcomes to effectively monitor and evaluate learner progress.	The teacher effectively aligned her assessments with the MATATAG curriculum by using a diagnostic recall of prior table-setting knowledge and a practical summative exam. She ensured the assessment directly measured the lesson objective of demonstrating 10 napkin folding techniques. This structured approach allowed students to show their functional skills in a logical, step-by-step manner.
(#21) **The teacher used strategies for providing timely, accurate and constructive feedback to improve learner performance**	7 The teacher consistently provided high-quality, accurate, and constructive feedback in a timely manner, which learners used to	The teacher practiced "errorless teaching" by stopping to check student progress and providing coaching to those who were lagging behind. She gave immediate, constructive feedback during the demonstration and scaffolding phases to correct errors before they

	improve their performance and take ownership of their own learning."	became habits. This timely support helped students gain confidence and mastery over the complex folding sequences.

MY REFLECTIONS AND INSIGHTS GAINED FROM THE LESSON OBSERVATION IN RELATION TO MY COURSE

2E-EDUC 4- ASSESSMENT OF LEARNING

This classroom observation has emphasized how assessment can be integrated into a lesson to promote mastery rather than just to measure the achievement of the students. By recall the previous lesson of table-setting and table appointment, the teacher ensured learners were ready for the new task. I realized that “errorless teaching” is a powerful formative strategy, as Dr. Castro provided immediate coaching and feedback to correct folding techniques in real-time. This proactive approach prevents the students to pick up the mistakes and treat it as the truth before the summative practical exam. She also presented rubrics first before the assessment, ensuring that the students attains transparency and integrity in rating their outputs. Furthermore, the teacher's use of asynchronous video materials showed how assessment can be differentiated to support diverse learning paces. Ultimately, the lesson proved that effective assessment is most successful when it aligns directly with the functional objectives of the curriculum. This experience reinforces that the human element of coaching and encouragement is a vital catalyst for skill acquisition.
