2E-EDUC 6 – FIELD STUDY
Term 2 SY 2025-2026
Teacher-made Classroom Observation Tool at PNU FGEEL-ITL
February 23- 27/March 3 – 6, 2026

Name of CTP Student: EVARDO, Ezekiel John M.	Class Observation Profile
Degree Finished: BS Psychology	School/Institution: PNU – Center for Teaching and Learning
Date Submitted: March 14, 2026	Date of Observation: February 23, 2026, Tuesday Time: 3:00 - 5:00 PM
	Learning Area/Subject Observed: TLE Grade/Year Level: Grade 8
	Quarter: 3rd Quarter Week No.: 3
	Enrolment: No. of : Boys: 8 Girls: 13 Total: 21

Subject Matter/Topic: Family and Consumer Sciences: Table Napkin Folding
Lesson Objectives:

1. Identify the importance of napkin folding in table appointments.

2. Demonstrate at least 10 basic napkin folding techniques (e.g., Pyramid, Bishop's Hat, Fan) in two minutes.

3. Appreciate the value of creativity and precision in food service.

Taft Ave. cor. Ayala Blvd., Ermita, Manila (+63 2) 5317 1768 loc. 570/776 | mall@pnu.edu.ph

Part I. Overview of Teaching-Learning Observations

Observe the teaching and learning episode and answer the following briefly:

Questions	Brief Significant Observations
1. How did the teacher implement the following? Please describe strategies and/or techniques employed.	
(A) Lesson Introduction/Preliminary Activities	
Lesson Objectives	The teacher simply presented and communicated the learning objectives to the class as briefly and practical as possible.
Activation of Prior Learning/Knowledge	The teacher simply recalled the previous topic of how to set cutlery, plates, and glassware to the table and started to transition to napkins on table spreads.
Motivational Activities	She asked 2 students who had difficulties from the previous assessment of table setting from the past discussion.
(B) Lesson Proper /Developmental Activities	She demonstrated table napkin folding in 10 ways as the students follow her.
(C) Culminating/Closure Activities	She ended the class through a practical assessment of the first 10 students who volunteered for their assessment. The remaining students will be conducting their practical examinations next meeting.
2. What teaching methods/ approaches/ did the teacher use? Please describe.	She uses direct instruction by allowing students to mimic her folding strategies. • She uses explicit modeling, as she proves to be the expert of the fold sequences. • She also used step-by-step scaffolding during the assessment to correct the errors done by the students. • She was also keen and giving with immediate feedback to her students during her explicit modeling and scaffolding.
3a) What instructional materials were used by the teacher?	She hasn't presented any instructional material as she already knows the folding sequences by heart.
3b) What audio-visual technology /ICT were used by the teacher?	None. The students simply used napkins as they mimic the teacher.
4. How did the teacher assess the attainment of the lesson objectives?	She had allowed a first wave of students who volunteered to have their practical exam right after her demonstration and further expounding.
5. How did the teacher end/close the lesson?	She closed the lesson by explicitly mentioning the "whys" of table napking

Did the teacher provide application /extension activities for learners to demonstrate acquired knowledge, understanding and skills? Please describe briefly.	folding, and its importance to a table setting and appointment. She provided video samples to those who are about to have their practical exam later this week.

Part II. Observation by Domains and Indicators

Domain A. Content Knowledge and Pedagogical Principles
(CHED: Professional Knowledge/PPST Domain 1

Indicators	Objective Evidence/Observation Notes
1. Teacher demonstrates mastery of subject matter.	**Yes, she didn't had to use other materials or consult a video guide or textbook in table napkin folding as she can do it by herself.**
2. Concepts are presented accurately and clearly.	**Yes, she was very succinct in terms of explaining things without unnecessary segue.**
3. Teaching reflects sound principles of learning (e.g., motivation, readiness, reinforcement, etc.)	**Yes, she ensured that the tone of the class is interested with table settings as she hyped the class through verbal motivation how they can use this skill if they ever choose the Hospitality Industry.**
4. Instruction is appropriate to learners' level.	**Yes, everyone was able to follow and the tasks are well-intended to the normative milestones of the Grade 7 students**

Reflective Prompt: Which teaching principles were most evident in the lesson?

The Principle of Modeling and Imitation was highly demonstrated in the class, as she provides clear visual standard for students to replicate. By using a "Show-Tell-Do" approach, the lesson made use of Scaffolding to break down complex folds into manageable sequence steps. She also uses Experiential Learning (Learning by Doing) by asking the students not only to memorize the folds but also to let them get accustomed through it in terms of muscle memory.

Domain B. Instructional Methods and Strategies
(CHED: Pedagogical Skills / PPST Domain 1 & 4)

Indicators	Objective Evidence/Observation Notes
1. Teaching method/approach matches lesson objectives.	**Yes, direct instruction is the best suited approach for teaching students different table napking folding.**
2. Strategies are varied (lecture, discussion, inquiry, demonstration, etc.)	**Somewhat. This is inapplicable to a lesson objectives as such.**
3. Teacher uses questioning techniques to promote thinking.	**Not Applicable.**
4. Learners are actively engaged in learning tasks.	**Yes, everyone is imitating her folds.**

Reflective Prompt: How effective were the chosen teaching methods in facilitating student learning?

The teaching methods were effective given that they were able to reach the learning objectives parsimoniously.

Domain C. Curriculum Alignment and Lesson Structure
(CHED; Curriculum Competence / PPST Domain 4)

Indicators	Objective Evidence/Observation Notes
1. Lesson objectives are aligned with K-12 Curriculum Guide/MATATAG Curriculum Guide.	**Yes, table napkin folding is a skill expected to be taught under the MATATAG curriculum.**
2. Lesson sequence (scaffolding the order of topics) is logical and coherent.	**Yes, it is as simple as it can be and students can make sense of it.**
3. Learning activities support the attainment of learning objectives.	**Yes, a practical assessment after demonstration assesses if the students were able to reach the learning objectives.**
4. Instruction connects to real-life or local contexts.	**Yes, they can use such skills if they are to pursue such careers later.**

Reflective Prompt: How does the lesson design support meaningful learning?

The lesson design is as simple as possible and it lets the teacher meet the learning objectives as effortless as possible.

Domain D. Learner Engagement & Diversity
(CHED: Learner-Centered Teaching / PPST Domain 3)

Indicators	Objective Evidence/Observation Notes
1. Learners participate actively.	**Yes, everyone is immersed with mimicking the table napkin folding.**
2. Instruction considers learner diversity.	**Yes, the teacher was also able to give prior video recording materials that allows students to learn through their pace if they aren't into listening while the class is on-going.**
3. Teacher encourages collaboration and interaction between and among learners and small group of learners.	**Not applicable. This is a direct instruction method.**
4. Learners demonstrate understanding during the lesson.	**Yes, they are able to follow the sequences in folding.**

Reflective Prompt: How does the teacher address differences among learners?

The teachers addressed it by giving video recording of the folding sequences right before the class has started.

Domain E. Assessment & Feedback

(CHED: Assessment Literacy / PPST Domain 5)

Indicators	Objective Evidence/Observation Notes
1. Teacher checks for understanding during the lesson.	**Yes, from time to time, she stops and checks the progress of her students and provide coaching to those whom she feels are lagging behind.**
2. Assessment methods align with lesson objectives.	**Yes, it is as simple as it can be.**
3. Feedback is timely and constructive.	**Yes, she gave feedback immediately and so she practices errorless teaching.**
4. Learners are informed of performance expectations.	**Yes, she communicated the rubrics for grading before the practical exam started.**

Reflective Prompt: How does assessment support learning rather than merely measure it?

Assessment can provide opportunities for correcting wrong folding sequences to the students and so it promotes correct desirable techniques for table napking folding.

Domain F. Classroom Management & Learning Environment
(CHED: Professional Practice / PPST Domain 2)

Indicators	Objective Evidence/Observation Notes
1. Classroom routines are well-established.	**Yes, the students, despite having some chatters, can still maintain proper decorum.**
2. Teacher manages behavior positively.	**Yes, she uses the phrase "Saan sa classroom na ito ang tahimik na lugar/grupo?" as the students tries to emulate such characteristics.**
3. Learning environment is respectful and inclusive.	**Yes, she has already established rapport with her students.**
4. Instructional time is maximized.	**Yes, she was able to assessment almost half of the class.**

Reflective Prompt: How does classroom management support effective instruction ?

It can save time for ensuring that the pacing of the lesson and activity doesn't get disrupted or skipped out to meet the original intended learning objectives.

Domain G. Values Integration & Professional Ethics
(CHED: Ethical Practice / PPST Domain 6)

Indicators	Objective Evidence/Observation Notes
1. Teacher models professionalism and ethical conduct.	**Yes, but she is more on the side of warm and authoritative teacher**

	than a strictly formal instructor.
2. DepEd Core Values (Maka-Diyos/Maka-tao, Makakalikasan and Makabansa) are evident in practice.	**Not applicable.**
3. PNU Core Values (Truth, Excellence and Service) are evident in practice.	**Yes, she was able to model the 3 core values as was able to deliver her instructions smoothly.**
4. There is a rapport and respectful teacher-learner interaction.	**Yes, and it helps that she is the class adviser of the said class.**
5. Teacher demonstrates commitment and dedication to teaching.	**She ensures that everyone is not lagging behind by providing prompt feedbacks to everyone.**

Reflective Prompt: How are values and professionalism reflected in teaching practice?

I would say that a student's ability to be able to pick-up the lesson despite possibly having a misaligned interest with the topic at hand. The students, who are possibly uninterested with table napkin folding, was able to appreciate it, and it shows how the teacher is really passionate (values) and masterful (professional) in delivering the lesson.

Part III. Reflective Synthesis (Post-Observation)

1. Significant Teaching Practices Observed
Identify at least two practices that strongly support learning.

1. Expert Modeling and Errorless Teaching: The teacher's mastery allowed her to demonstrate the folds without needing external aids. By providing immediate, corrective feedback during the "Show-Tell-Do" phase, she practiced "errorless teaching," ensuring students didn't internalize incorrect folding sequences before the formal assessment.
2. Proactive Differentiation: Even within a direct instruction framework, the teacher addressed learner diversity by providing asynchronous video materials. This supports students who may have missed a step during the live demonstration or those who require multiple repetitions to achieve mastery, effectively extending the "learning zone" beyond the classroom hours.

Taft Ave. cor. Ayala Blvd., Ermita, Manila (+63 2) 5317 1768 loc. 570/776 | mail@pnu.edu.ph

2. Areas for Growth (from a professional perspective)
Describe possible improvements, grounded in theory.

1. Integration of Collaborative Learning: While the teacher used direct instruction effectively, the lesson could be enhanced by incorporating Social Constructivism (Vygotsky). Allowing students to work in pairs (Peer Tutoring) after the demonstration would enable those who mastered the fold quickly to assist those struggling, reinforcing the skill for both parties.
2. Use of Visual Scaffolding (ICT/Instructional Materials): Although the teacher knows the folds by heart, providing a printed or projected infographic with step-by-step arrows would cater to visual learners who might struggle to follow hand movements in a large 3D space. This aligns with Dual Coding Theory, where verbal instructions are reinforced by static visual cues.

3. Personal Reflection
As a post-baccalaureate student, how does this observation shape your understanding of teaching and learning?

As a post-baccalaureate student, this observation reinforces the idea that teacher credibility and rapport are the foundations of effective classroom management. I realized that "mastery of subject matter" isn't just about knowing the content; it's about the confidence it gives the teacher to move freely and interact with students. It shaped my understanding that while high-tech tools are valuable, the human element—modeling, coaching, and verbal encouragement—remains the most powerful catalyst for skill acquisition in a TVL/TLE context.

4. Theory–Practice Connection
Which theories, principles, or concepts from your Field Study course are evident in the lesson?

- Bandura's Social Learning Theory: This was the most evident principle. Learning occurred through the observation and imitation of a "competent model."
- Zone of Proximal Development (ZPD): Through "scaffolding" and "coaching," the teacher guided students from their current ability (not knowing a fold) to their potential ability (mastering 10 folds) with her temporary support.
- Thorndike's Law of Exercise: The practical assessment and the repetition of the folds emphasize that "practice makes permanent," strengthening the S-R (Stimulus-Response) bond through physical drill.
- MATATAG Curriculum Alignment: The focus on "functional literacy" and "livelihood skills" aligns with the curriculum's goal of producing job-ready, skilled learners.

Part IV. Observer's Take-Away
Insights from this observation that will influence my future teaching practice . . .

You do not need to plan an elaborate teaching method or design a well-crafted sequences of teaching procedures to deliver a highly effective lesson to the students. All you need to do is to ensure that your method fits with the learning objectives.

Part V. Signatures (If possible/if circumstances pemit.)

- Teacher Observed: **Dr. Lorena A. Castro** Date: **February 24, 2026**
- Course Professor/ Supervisor: **Prof. Dominador Mangao** Date: **March 14, 2026**
