Worksheet 2: Rubric

GROUP 1

Members:
1.) Aliven, Juan Carlos
2.) Aparace, Cathlyn Mae
3.) De Castro, Jhona Paula
4.) Evardo, John Ezekiel

Instruction: Review the performance task you prepared for Worksheet 1. List the behaviors that will measure the identified competencies and list them down in the template below.

Performance Task: Integrated Sustainable Crop Production Project
Learning Area: TVL – Agriculture
Grade Level: 10 | Quarter: 3 | Duration: 4 Weeks

Most Essential Learning Competencies (MELCs):

- **AGR10-IIIb-1:** Demonstrate proper soil preparation, planting, and maintenance techniques for selected crops.
- **AGR10-IIIb-2:** Apply integrated pest management and sustainable practices in crop production.
- **AGR10-IIIb-3**: Monitor, evaluate, and report crop growth and productivity using data collection and analysis.

RUBRIC:

Criteria (SMART)	Weight	4 – Outstanding	3 – Very Satisfactory	2 – Satisfactory	1 – Needs Improvement
Demonstration of Proper Soil Preparation, Planting, and Maintenance Techniques *(Specific, Attainable)* (AGR10-IIIb-1)	25%	Consistently demonstrates proper and correct techniques appropriate for the selected crop, with complete documentation.	Demonstrates proper techniques with minor errors; documentation is adequate.	Demonstrates techniques with frequent errors affecting growth; limited documentation.	Fails to demonstrate proper techniques; little to no documentation.
Application of Integrated Pest Management and Sustainable Practices *(Relevant, Specific)* (AGR10-IIIb-2)	25%	Appropriately applies IPM and sustainable practices based on observed crop conditions and explains their effects.	Applies IPM and sustainable practices with limited justification or effectiveness.	Attempts to apply practices but application is inappropriate or poorly explained.	Does not apply IPM or sustainable practices.

Monitoring of Crop Growth and Productivity *(Measurable, Time-bound)* (AGR10-IIIb-3)	20%	Consistently monitors crop growth using accurate, dated data supported by photo evidence.	Monitors crop growth regularly with minor gaps in data.	Monitors crop growth irregularly with incomplete data.	Does not monitor crop growth or productivity.
Evaluation and Reporting Using Data *(Measurable, Relevant)* (AGR10-IIIb-3)	20%	Clearly evaluates and reports crop growth using collected data, identifying trends, challenges, and outcomes.	Reports crop growth using data with limited evaluation.	Reports crop growth with minimal use of data.	Fails to evaluate or report crop growth.
Timeliness and Completeness of Outputs *(Time-bound)*	10%	All required outputs are complete and submitted on time.	Outputs are complete but submitted 1–3 days late.	Outputs are incomplete or submitted 4–7 days late.	Outputs are largely incomplete or submitted 8 days or more late.

Summary of Measured Behaviors

These criteria measure students' ability to:

Plan a feasible and sustainable crop production project
Implement correct agricultural practices
Apply sustainable and IPM strategies appropriately
Monitor and evaluate crop growth using data
Reflect and communicate learning outcomes clearly

Scoring Guide

Outstanding (4) – Performance exceeds expectations
Very Satisfactory (3) – Performance meets expectations with minor gaps
Satisfactory (2) – Performance meets minimum expectations
Needs Improvement (1) – Performance does not meet expectations

Total Score = (Score × Weight) per criterion
Maximum Score = 100%

You will be rated in this worksheet using the rubrics below.

Criteria	4* Outstanding	3 Very Satisfactory	2 Satisfactory	1 Needs Improvement
Completeness of the Criteria 50% The set of criteria clearly identified the requirements of the final output.	The checklist is complete	One or two elements are missing in the checklist	Three or four elements are missing in the checklist	Five or more are missing in the checklist
Weight given to each criterion 10%	All weights are reasonable	One of the weights is not reasonable	Two of the weights are not reasonable	Three or more weights are not reasonable
Nature of the Identified Criteria (5%)	ALL identified behaviors are SMART and are aligned to the competencies.	One or two identified behaviors are **NOT SMART** and/or are aligned to the competencies.	Three or four identified behaviors are **NOT SMART** and/or are aligned to the competencies.	Five or more of the identified behaviors are **NOT SMART** and/or are aligned to the competencies.
Descriptions/Indicators (30%) The criteria are well described	ALL of the given indicators of an outstanding output are evident.	1 of the given indicators of an outstanding output is not evident.	2 of the given indicators of an outstanding output are not evident.	3 or more of the given indicators of an outstanding output are not evident.
Promptness of Submission (5%)	The output is submitted on or before the deadline.	The output is submitted one-three days after the set deadline.	The output is submitted four to seven days after the deadline.	The output is submitted eight or more days after the deadline.

**To obtain the WS score, the weighted score will be multiplied to 6. Maximum score is 24.*
