Worksheet 3: Final Performance Task and Rubric

Members:
1. Aliven, Juan Carlos
2. Aparace, Cathlyn Mae
3. De Castro, Jhonna Paula
4. Evardo, John Ezekiel

Instruction: Finalize the performance task and rubric.

I. Performance Task

Title of the Topic:	**AGRICULTURE AND FISHERY ARTS**
Area:	**SECTOR:** AGRICULTURAL CROP PRODUCTION
Grade level:	10
Quarter:	Quarter 3
Competencies with code:	1. **2023.10.01 -** Prepare records of the different materials, tools, and equipment used in agricultural crop production
	2. **2023.10.02 -** Perform nursery operations according to occupational Safety and Health Standards.
	3. **2023.10.03 -** Perform plant propagation
	4. **2023.10.04 -** Perform seed testing
	5. **2023.10.05** - Prepare growing media

Description of the task that targets the identified competencies

Task Overview:

The performance-based task "Integrated Sustainable Crop Production Project" for Grade 10 TLE students focuses on a practical, hands-on project that integrates several key competencies for 4 weeks or more.

Description of the Task:

Students shall be grouped based on the total number of learners in each section, with the teacher facilitating and guiding the formation of groups. Each group shall designate a group leader and an assistant leader who will oversee and monitor the progress of the project. The task requires students to plan and implement a sustainable crop production project, which typically involves selecting a specific crop, preparing the necessary materials, tools, and equipment, conducting nursery operations, performing plant propagation and seed testing, and preparing the appropriate growing media. Students are expected to apply occupational safety and health standards throughout the process to ensure a safe and efficient working environment. Students may select seeds like eggplant, okra, string beans, monggo beans, or whichever is available for their project.

Student Requirements:

Students are required to perform a comprehensive set of activities over a four-week period, integrating the specified competencies:

1. **Planning and preparation:** Students must prepare a production plan that includes the identification and readiness of all required materials, tools, and equipment.
2. **Operational execution:** They need to carry out nursery operations, including plant propagation, seed testing, and preparing growing media. This involves applying specific technical skills.
3. **Safety and documentation:** Adherence to Occupational Safety and Health (OSH) standards is mandatory throughout the entire operation. They must also maintain detailed and accurate production records.
4. **Sustainability application:** The project emphasizes sustainable practices and may require innovative farming strategies.

Expected Student Output

The final outputs demonstrate both the practical application of skills and the ability to manage and document a project:

1.) **A successfully cultivated crop:** The primary physical result of the project, grown according to the planned sustainable methods.

2.) **Prepared farm inputs:** Functional tools and equipment, viable seeds or healthy propagated plants, and suitable growing media.

3.) **Comprehensive records:** Detailed logs of all activities, materials used, costs (if applicable), and observations from the nursery operations and production process.

4.) **A final project report/portfolio:** A compilation of the production plan, records, and a narrative summary that analyzes the results, challenges faced, and lessons learned during the four weeks. This documentation is a key part of the assessment.

Recommended Student Weekly Tasks

Week 1: Planning, Preparation, and Seed Testing
Focus on initial planning, gathering materials, and ensuring the viability of the planting material/s.

Day	Suggested Tasks	Competencies Addressed
Day 1-2	Project planning, crop selection (e.g., fast-growing vegetables), research sustainable practices, and interpret project requirements.	Record keeping (planning phase)
Day 3-4	Identify and gather necessary tools, materials, and equipment. Perform initial checkup and maintenance of tools.	2023.10.01; OHS Standards
Day 5	Conduct initial visual safety inspection of the work area. Begin a formal record-keeping log of all items gathered.	OHS Standards; 2023.10.01
Weekend	Optional: Initial material preparation (e.g., cleaning pots), review plan.	

Week 2: Growing Media, Seed/Plant Preparation, and Initial Planting
Focus on preparing the best environment for the crops and initial operations.

Day	Suggested Tasks	Competencies Addressed
Day 1-2	Research and select the best growing media components for the chosen crop.	2023.10.05
Day 3	Prepare and mix the growing media according to established procedures. Store properly.	2023.10.05
Day 4	Perform formal seed testing (e.g., ragdoll method or water test) to assess viability. Record results.	2023.10.04; 2023.10.01
Day 5	Begin plant propagation activities (e.g., stem cutting, marcotting) or sow viable seeds in the prepared media.	2023.10.03; 2023.10.02
Weekend	Monitor moisture levels of planted media/seeds.	

Week 3: Nursery Operations and Maintenance
Focus on maintaining the growth environment and applying crop care practices.

Day	Suggested Tasks	Competencies Addressed
Day 1	Monitor seedlings/propagated plants. Record observations in logbook.	2023.10.02
Day 2	Implement a regular and appropriate irrigation schedule based on the crop's needs.	2023.10.02
Day 3	Apply fertilizer/nutrient management program if necessary (e.g., compost application).	2023.10.02
Day 4-5	Perform routine cultivation and weed control (e.g., hand weeding around plants). Address any pest or disease issues using sustainable methods.	2023.10.02
Weekend	Monitor plant health and document growth progress.	

Week 4: Management, Documentation, and Post-Project
Focus on final recording, preparing the outputs, and overall project summary.

Day	Suggested Tasks	Competencies Addressed
Day 1-2	Continue daily monitoring and routine care. Collect final data on plant growth, yield (if any), and success rates of propagation/seed testing.	2023.10.02; 2023.10.01
Day 3	Organize all collected records (materials list, OHS procedures, nursery log, results). Start compiling the final project report/portfolio.	2023.10.01
Day 4	Clean and maintain all used tools and equipment. Store materials and dispose of waste according to OHS and environmental procedures.	OHS Standards
Day 5	Finalize the project report. Prepare physical outputs (e.g., the cultivated crop, a sample of the prepared growing media) for presentation or assessment.	2023.10.01; Final Outputs

Key Measurable Indicators

Measurable indicators for the "Integrated Sustainable Crop Production Project" can be quantitative (numerical) and qualitative (observable standards) measures that demonstrate the student's mastery of specific competencies. These indicators align with industry practices and safety standards.

1. Preparation of Records (2023.10.01)

1. Completeness of Documentation: Measured by the presence of a full inventory of all materials, tools, and equipment used in the project, including purchase dates, quantities, and costs (if applicable).
2. Accuracy of Records: Assessed by cross-referencing actual items used with the written inventory and ensuring accurate use of technical terms and units.
3. Organization: The logbook or report is organized logically and maintained consistently over the 4-week period.

2. Nursery Operations & OHS Standards (2023.10.02)

2.1 Compliance with OHS: Measured by adherence to safety protocols during all operations. Indicators include:

1) **Proper use of Personal Protective Equipment (PPE):** Students consistently wear appropriate safety gear (gloves, boots, etc.).
2) **Workplace Sanitation:** The nursery area is kept clean and free of clutter and waste materials are disposed of correctly.
3) **Accident/Incident Rate:** Zero recorded injuries or safety incidents during the project's duration.

2.2 Nursery Management: Assessed by the quality and functionality of the nursery setup. Indicators include:

1. **Facility Maintenance:** Nursery facilities are maintained and repaired as needed to ensure efficiency.
2. **Environmental Control:** Appropriate measures are taken to protect plants from inclement weather (e.g., proper shed setup).

3. Plant Propagation (2023.10.03)

6. **Success Rate of Propagation:** Measured as the percentage of propagated plants (e.g., cuttings, graftings, or layerings) that successfully establish roots and survive after a specific period.
7. **Quality of Propagules/Seedlings:** Assessed by the visual health, vigor, uniformity, and adherence to "prescribed characteristics" for the chosen crop variety.

4. Seed Testing (2023.10.04)

5. **Germination Percentage:** A quantitative indicator derived from the seed test (e.g., ragdoll method). This is compared against expected standards for the specific seed type.
6. **Documentation of Results:** A clear, recorded result of the seed test that informs the subsequent planting decisions.

5. Growing Media Preparation (2023.10.05)

1. **Correct Mixture and Preparation:** Measured by the growing media's adherence to the recommended composition for the specific crop requirement.
2. **Proper Labeling and Arrangement:** Assessed by whether containers are appropriately labeled by variety and arranged according to crop needs in the nursery shed.

Reflective guide in developing the performance task:

1. How will the task target the identified competencies in a flexible *learning environment*?
2. Are you sure that the behaviors that will be observed are measurable using a tool?
3. Is the time allotment for the task enough for you to target the competencies?
4. Does the task show direct application of knowledge in real-life?
5. Does the task also target higher-order thinking skills?

II. Rubric (Consider your outputs in Worksheets 1 and 2. Revisions are allowed based on the comments given). Write your criteria in the first column, weight in the second column. Write the scores for each level (it could be a range like 90-100 for Level 1, so on and so forth). In each scale, describe clearly the indicators.

Competencies	Criteria	Weight	Performance Level 1	Performance Level 2	Performance Level 3	Performance Level 4	Weighted Score
			Excellent (90–100): *All tasks done correctly with* ***0 errors/deviations*** *(records accurate, tools stored, signage placed, waste segregated, cuttings precise, seeds spaced, media measured/sieved, pots filled)*	***Good (85–89):*** *Mostly correct with* ***1–2 minor errors/deviations*** *(small lapses in records, tools, signage, waste, propagation, seed spacing, media, or pots)*	***Needs Improvement (80–84):*** *Partially correct with* ***3–5 errors/deviations*** *(inconsistent performance or multiple minor mistakes across tasks)*	***Poor (75–79):*** *Incorrect or incomplete with* ***more than 5 errors/deviations*** *(major lapses in records, tools, signage, waste, propagation, seed handling, media, or pot filling)*	
Competency 2023.10.01 (25%) ***Prepare records of materials, tools, and equipment***	1 Inventory Logging Accuracy	8%	Records all fields completely and accurately, with 0 errors	Records all fields with 1–2 minor errors (e.g., typos or formatting)	Records contain 3–5 errors, with incomplete or inaccurate entries	Records contain more than 5 errors, with many required fields missing or incorrect	
	2. Asset Tag Verification	6%	Matches all tools correctly with asset tags or	Matches tools correctly, with	Matches tools with 3–5	Fails to match tools correctly, with more than	

			serial numbers, with 0 errors	1–2 incorrect matches	incorrect matches	5 incorrect matches	
	3. Defect Documentation Clarity	6%	Provides detailed, specific, and complete descriptions (including location, type, and reference), with 0 errors	Provides clear descriptions with 1–2 missing details	Provides incomplete descriptions with 3–5 missing details	Provides unclear or vague descriptions, with more than 5 missing details	
	4. Stock Monitoring Reporting	5%	Reports all low stock levels proactively, with 0 missed reports	Reports after prompting, with 1–2 missed reports	Reports only when reminded, with 3–5 missed reports	Fails to report low stock levels, with more than 5 missed reports, resulting in stockouts	
Competency 2023.10.02 (20%) ***Perform nursery operations following OSH standards***	5. Safety Signage Compliance	5%	Places correct signage proactively, with 0 misses, and maintains visibility throughout	Places signage after one prompt, with 1–2 misses	Places signage only when reminded, with 3–5 misses	Fails to place signage, with more than 5 misses	
	6. Proper Tool Storage	5%	Cleans, organizes, and stores tools immediately and correctly, with 0 deviations	Stores tools properly, with 1–2 minor deviations	Stores tools inconsistently, with 3–5 deviations	Fails to store tools properly, with more than 5 deviations	
	7. Waste Segregation Accuracy	5%	Segregates all waste correctly, with 0 errors	Segregates waste properly, with 1–2 errors	Segregates waste inconsistently, with 3–5 errors	Fails to segregate waste, with more than 5 errors	
	8. Emergency Readiness Awareness	5%	Identifies and explains all emergency facilities accurately, with 0 errors	Identifies all facilities, with 1–2 errors	Identifies some facilities, with 3–5 errors	Fails to identify facilities, with more than 5 errors	
Competency 2023.10.03 (25%) ***Perform plant propagation***	9. Cutting Preparation Technique	8%	Performs clean, precise cuts using proper technique, with 0 errors	Uses correct technique, with 1–2 minor errors	Uses inconsistent technique, with 3–5 errors	Uses incorrect technique, with more than 5 errors, causing damage	
	10. Rooting Hormone Application	6%	Applies hormone correctly with no contamination, with 0 errors	Applies correctly, with	Applies inconsistently, with 3–5 errors	Applies incorrectly, with more than 5 errors	

				1–2 minor errors			
	11. Correct Insertion Depth	6%	Maintains correct insertion depth consistently, with 0 errors	Maintains correct depth, with 1–2 minor deviations	Shows inconsistent depth, with 3–5 devi	Uses incorrect depth, with more than 5 deviations	
	12. Proper Labeling	5%	Provides complete, accurate, and organized labels, with 0 errors	Provides correct labels, with 1–2 minor errors	Provides incomplete labels, with 3–5 errors	Fails to provide proper labeling, with more than 5 errors	
Competency 2023.10,04 (15%) ***Perform seed testing***	13. Moisture Control	4%	Maintains optimal moisture, with 0 deviations	Maintains proper moisture, with 1–2 deviations	Maintains inconsistent moisture, with 3–5 deviations	Maintains incorrect moisture, with more than 5 deviations	
	14. Speed Spacing Accuracy	4%	Arranges seeds accurately, with 0 errors	Arranges properly, with 1–2 errors	Arranges inconsistently, with 3–5 errors	Arranges poorly, with more than 5 errors	
	15. Environmental Control	4%	Maintains optimal environment, with 0 deviations	Maintains appropriate conditions, with 1–2 deviations	Maintains inconsistent conditions, with 3–5 deviations	Maintains incorrect conditions, with more than 5 deviations	
	16. Accurate Data Entry	3%	Records complete and accurate data, with 0 errors	Records mostly accurate data, with 1–2 errors	Records data with errors, with 3–5 errors	Records incomplete or incorrect data, with more than 5 errors	
Competency 2023.10.05 (15%) ***Prepare growing media***	17. Sieving Effectiveness	4%	Sieves thoroughly with no debris, with 0 deviations	Sieves properly, with 1–2 deviations	Sieves partially, with 3–5 deviations	Fails to sieve properly, with more than 5 deviations	
	18. Component Measuring	4%	Measures accurately and consistently, with 0 errors	Measures correctly, with 1–2 errors	Measures inconsistently, with 3–5 errors	Fails to measure properly, with more than 5 errors	
	19. Moisture Testing	4%	Achieves correct moisture level, with 0 deviations	Achieves acceptable moisture, with 1–2 deviations	Shows inconsistent moisture results, with 3–5 deviations	Maintains incorrect moisture, with more than 5 deviations	

	20. Proper Pot Filling	3%	Fills pots uniformly to correct level, with 0 errors	Fills correctly, with 1–2 deviations	Fills inconsistently, with 3–5 deviations	Fills incorrectly, with more than 5 deviations

The rubric below will be used to rate your developed rubric above. Attach this rubric when you submit your output.

Criteria	4* Outstanding	3 Very Satisfactory	2 Satisfactory	1 Needs Improvement
Content (5%) The performance task . . . 4. targets the stated learning competencies 5. involves the application of knowledge in real-life 6. challenges students' thinking and creativity skills 7. includes contextualized activities 8. enhances students' understanding of the lesson can be done within reasonable time	ALL of the given indicators of an outstanding output are evident, and nothing else.	Only 1 of the given indicators of an outstanding output is not evident; or 1 identified indicator should not be there.	Only 2-3 of the given indicators of an outstanding output are not evident; or 2-3 identified indicators should not be there; or 1 given indicator of an outstanding output is missing **AND** 1 given indicator should not be there.	Four to 5 of the given indicators of an outstanding output are not evident; or 4-5 identified indicators should not be there; or 2-3 of the given indicators of an outstanding output are not evident **AND** 2-3 identified indicators should not be there
Completeness of the Criteria (5%) The set of criteria clearly identified the requirements of the final output.	The checklist is complete	One or two elements are missing in the checklist	Three or four elements are missing in the checklist	Five or more are missing in the checklist
Weight given to each criterion (5%)	All weights are reasonable	One of the weights is not reasonable	Two of the weights are not reasonable	Three or more weights are not reasonable
Nature of the Identified Criteria (5%)	ALL identified behaviors are SMART and are aligned to the competencies.	One or two identified behaviors are **NOT SMART** and/or are aligned to the competencies.	Three or four identified behaviors are **NOT SMART** and/or are aligned to the competencies.	Five or more of the identified behaviors are **NOT SMART** and/or are aligned to the competencies.
Indicators per Performance level (65%)	The rubric accurately assesses students' expected output(s) at all levels.	The rubric assesses students' expected output(s) but needs 1-3 revisions.	The rubric assesses students' expected output(s) but needs 4-6 revisions.	The rubric assesses students' expected output(s) but needs 7 or more revisions.
Construction (10%) 1. Instructions are clearly stated. 2. Free from grammatical errors. 3. Language used is appropriate to the intended students.	ALL of the given indicators of an excellent output are evident.	1 of the given indicators of an excellent output is/are not evident.	2 of the given indicators of an excellent output are not evident.	ALL of the given indicators of an excellent output are not evident.
Promptness of Submission (5%)	The output is submitted on or before the deadline.	The output is submitted one-three days after the set deadline.	The output is submitted four to seven days after the deadline.	The output is submitted eight or more days after the deadline.

** To obtain the WS score, the weighted score will be multiplied to 18. Maximum score is 72.*
